

PRODUCT INFORMATION**KEKKILÄ OPM 525 W CL R7734**

Kekkilä Professional supplies a wide range of high performance growing solutions worldwide securing good growing results for all types of plants in different growing conditions. The basis of Kekkilä Professional substrates is carefully selected, first-class Sphagnum peat harvested from our own peat bogs. Own peat raw material secures constant product quality throughout the season and from year to year.

OPM 525 W CL R7734 is a mix of raw materials from Sphagnum peat screened to Medium-Coarse grade, limed and fertilised. By removing the finest particles of this 5–25 mm product we are securing good drainage and air capacity resulting in excellent roots and strong growth. Clay improves availability of nutrients (nutrient buffer) and re-wettability as well as brings more weight and structure to the substrate. Clay reduces easily available water and enchases more compact growth of plants. In addition, clay contributes to better and easier water absorption which is especially helpful after dry periods.

APPLICATION

Kekkilä OPM 525 W CL R7734 is suitable for use in 11–14 cm pots.

COMPOSITION

Peat raw material	Sphagnum peat 1.00 m ³
Production screening	5–25 mm
Other constituents	Clay granulate 20.00 kg/m ³

ADDITIVES

KS1 N-P₂O₅-K₂O 15-12-29 1.00 kg/m³
Limestone (Ca,Mg) 4.07 kg/m³
Iron (Fe) chelate 0.20 kg/m³
Wetting agent 0.11 l/m³
Long lasting trace elements 0.05 kg/m³

pH	pH (1+5 EN 13037)	5,9
	Press Water	5,5

CE	EC 1+5 EN 13038	32 mS/m
	Press Water	2,3 mS/cm
