

PRODUCT INFORMATION**KEKKILÄ OPM 630 W KS6 P pH 4.6 R8245**

Kekkilä Professional supplies a wide range of high performance growing solutions worldwide securing good growing results for all types of plants in different growing conditions. The basis of Kekkilä Professional substrates is carefully selected, first-class Sphagnum peat harvested from our own peat bogs. Own peat raw material secures constant product quality throughout the season and from year to year.

OPM 630 W KS6 P pH 4.6 R8245 is a mix of raw materials from Sphagnum peat screened to Medium-Coarse grade, limed and fertilised. By removing the finest particles of this 6–30 mm product we are securing good drainage and air capacity resulting in excellent roots and strong growth. Perlite is inert raw material and it improves air capacity, drainage, structural stability and re-wettability of the substrate. It is used for crops with sensitive roots and when faster drying of the trays or pots is needed.

APPLICATION

Kekkilä OPM 630 W KS6 P pH 4;6 R8245 is suitable for use in 10–13 cm pots.

COMPOSITION

Peat raw material	Sphagnum peat 0.90 m ³
Production screening	6–30 mm
Other constituents	Coarse perlite 100.00 l/m ³

ADDITIVES

KS6 N-P₂O₅-K₂O 16-9-20 0.70 kg/m³
Wetting agent 0.04 l/m³
Limestone (Ca,Mg) 1.20 kg/m³

pH	pH (1+5 EN 13037)	4,6
	Press Water	4,2
CE	EC 1+5 EN 13038	18 mS/m
	Press Water	1,3 mS/cm
